

## Advanced lubricants for **VOLVO COMMERCIAL VEHICLES**

Volvo are one of the largest truck manufacturers in the world. With a history stretching back to the 1920s, it is a company dedicated to safety, quality and the environment. And as one of the world's leading lubricant brands, we are committed to working with Volvo to produce the highest quality products that meet and often exceed their specifications, providing outstanding performance and protection for your Volvo commercial vehicle.

Volvo has developed its own specifications (e.g. VDS-4.5 for engine oils) and Texaco® products are approved against these key requirements. In addition, our products cover a full range of approvals for other manufacturers, meaning that we can meet the demands of other vehicles as well as your core Volvo fleet.
